Autism Awareness Crossword Puzzle

Complete the activity.

ACROSS

2. Occurs most often in girls - unlike autism, girls initially show normal development, then revert.

5. On the Autism Spectrum, defined by impairments in communication and social development and by repetitive interests and behaviors but having no significant delay in language and cognitive development.

6. Some kids with autism play differently, have trouble making eye contact and have trouble making friends.

7. Many children with autism are on special diets, which may include eliminating dairy, wheat and other foods.

8. Some kids with autism may have trouble talking, make strange sounds, or not talk at all.

DOWN

1. A neurological disorder that affects the normal development of communication and social skills.

3. Helps kids overcome or adjust to many difficulties, including speech, living skills and social skills.

4. Self Stimulatory Behavior - repetitious behaviors that seem pointless to people without autism.
